LUXOR
KEROSENE OIL
This celebrated brand of Kerosene, manufactured by the Chesebrough Manufacturing Company (the manufacturers of Vaseline) is without doubt the best in this Market. It is perfectly pure, gives a brilliant light, and is absolutely free from that disagreeable odour most kerosene has.
It will last ONE THIRD LONGER than any Kerosene Oil in this market, and the fire test being 150°, it cannot explode the lamps, and endanger, life as the yellow and cheap kerosene is likely to do at any moment! Send for free samples and test it.

No thoughtful, or careful engineer or owner of good machinery, can afford to remain ignorant or indifferent to the qualities of this celebrated lubricator. Its value can only be known by those who have properly used it. It is true the first cost is higher than common animal or vegetable oil, but it will last ONE THIRD LONGER and preserves machinery while other oils injure and corrode by the acid they contain, so that this oil is CHEAPER than any lubricator known.
Those who are wise will give it a fair trial. Samples will be furnished gratis.

THE INAUGURATION

THE INDUSTRIAL CLUB VICTORIOUS.

A glorious autumn day. The city gay from end to end with the flags of all nations. Wealth and Work alike have donned their holiday clothes for the great occasion—Argentina's first invitation to the society of nations to an Industrial 'at home.' Buenos Aires looks her best on this 15th of March 1882. Like many other 'belles' she hesitated till the last what dress she should don for the occasion, and, finally, like a true coquette, decided that it should be her very best, to make up for all the slights and rebuffs bestowed on her persistent and at last triumphant wooer the Industrial Club. 'Faint heart never won fair lady.' The worst enemies of the Industrial Club—and it had many, now converted into friends—could never, at any moment of the chequered career of the Exhibition, have charged it with this weakness, and must now frankly admit that its noble efforts and sacrifices met on Wednesday with an unanimous and triumphant recognition alike honourable to it and the country it has served so well. 'Let it be published', as the decree says; In spite of everything, the Continental Exhibition is an undoubted success, and we venture to predict confidently that its beneficial results will exceed the anticipations of its spirited promoters. All honour to them. They have won their spurs well.

From an early hour the whole city was astir, and flags and banners began to peep from roofs and top windows, but it was not till about 1 p.m. that the bunting 'came with a rush,' and whoever could beg, borrow or steal a flag flung it to the breeze. The general move Plaza Once-wards began about noon, and the tramways going in that direction had all they could do to meet the enormous traffic. The police stopped the cars at both sides of the Plaza long before there was any necessity for it, and the inconvenience to the public was very great.

Long before three o'clock those who had cards of invitation swarmed into the building and had a look about them (with sandwiches and beer at intervals) before President Roca should arrive. A thoroughly democratic looking assemblage they were, at least the Calle Piedad side visitors. Round the whole Plaza, down all the adjacent streets, and up the Flores Road as far as the Lacroze station, private and hired carriages and traps of all kinds were ranged in lines three deep, while the crowd of pedestrians kept pouring up from all quarters of the city, the crush at the front enterance in Calle Rivadavia being terrific. Here the troops were drawn up, Gen Levalle Colonel Donovan and the other Gefes prancing up and down with enough gold lace about them to turn out a dozen or two of Field Marshals. The troops looked splendid. The grandees began to arrive about half past 2 o'clock. Carriage after carriage drew up at the grand entrance. Now a bevy of gorgeously dressed and dusky beauties from the Interior are assisted to alight by papa, a big brother, or some other gentleman in waiting. Then comes a foreign Minister in resplendent blue and gold. Ah! It is Her Majesty's representative, Mr Petre. Baron Goudin, Brazilian Minister, follows, almost outshining his British confrere in gold lace. Then comes a contrast, General Osborne, U. States Minister, in the plain blue uniform of the army of the Great Republic. The ladies again, in a cluster of some twenty. Orientales for a fiver! Yes. How handsome they are, and how exquisitely dressed? Another bevey! Portenas, equally lovely, and running the others a neck and neck race for toilettes. A different group — half a dozen aged Generals of the nation in their gorgeous uniforms. There is an involuntary murmur of respect as they pass on with the motley crowd towards the concert hall. There is a pause. The grand entrance door is closed, and a side one opened through which the High Life stream continues to flow in. The wicket in the grand entrance opens and the Papal Delegate, Monsignor Matera, enters, dressed in black and purple, and attended by two clergymen. He has hardly passed on when the Archbishop of Buenos Aires arrives and walks with a dignified mien through the dense lane of visitors assembled inside near the door. Still the ladies pour in at the side door.

At ¼ past 3 o'clock a British subscriber behind us pulled out his watch and said 'The General is not as punctual as Her Majesty; he is late.' Hardly had he spoken when the crash of the muskets as the troops were called to 'attention!' showed that the President was coming. The Committee men rush up and down the human lane like the dog on the Derby course. They are barely in time. The state carriage dashes up. 'Present arms!' Another clash of muskets, the strains of the National Hymn burst forth, and the Chief Magistrate, in evening dress, with the 'banda' across his breast, walks through, bowing familiarly to friends on each side. H E. had vice-President Madero and the President of the Exhibition on each side, while the Cabinet Ministers, Governors, the Lord Mayor and a dense crowd of military officers and white-tied civilians followed.

The concert hall was packed to overflowing as H E entered, and the row-row of silks and satins announced to those outside that the assemblage (the great majority) ladies) had risen to thir feet. The President took his seat on the platform and again the rustle of feminine apparel was heard as the wearers resumed their seats, Dr Avellaneda and Messrs Urien, Coni and Lamas sat on President Roca's right, on his left the Ministers, Governors (of Buenos Aires, Cordoba and Rioja) and the Lord Mayor. Special seats were ranged on each side for the Diplomatic Corps. Hardly was the vast concourse seated when it had to rise again, while the Colon opera company sang the National Anthem in splendid style. At its conclusion Dr Avellaneda came forward and read the following eloquent address.

Mr. President and gentlemen,

The Club Industrial which has organised this Exhibition, requests you through me to inaugurate it in the name of the Nation. It is the first ranging outside the country's geographical limits that has ever been opened in this Republic, and it ought to be inaugurated under that glorious flag which is so well known in America, and be proclaimed by the voice of its Chief Magistrate.

Mr. President,

You will presently walk through this building and see that our summons has been responded to by every nation that it reached, and that the nature of the articles on view make this a genuine National and Continental Exhibition. It represents for us a powerful impulse to progress and industry, it being remarkable that it has been conceived in the bosom of the people, instinctively inspired by a natural feeling of greatness. It is, moreover, the greatest movement ever made in this part of America towards those universal relations of commerce which now more than ever, are links of human solidarity, and are represented by the interchange of products, by the star of navigation in the great Oceans, and by the immigrant who seizes on the desert by the railway, like a new Centaur on his iron horse.

It has been justly said that an Exhibition is the modern 'Forum' to which the Nations of the earth are summoned. It might perhaps be more truthfully said that it is an Universal microscosm, a small but living representation of future humanity,

By the light of these grand spectacles, the day may be seen when every man will have within his reach that which is most remote, such as the 'helecho' which grows in spite of the Polar frost—that which is most daring, like the spectroscope which calls the sun down to the sage's study, that he may examine whether the spots on it are anything more than scratches upon its luminous surface—that which is commonest, the products of every clime—and that which is the most hidden, such as the metals taken from the earth and the vegetable products raised from the depths of the sea, where they afford food for the coral, that patient builder of islands and continents, whose home is in the deep beyond the reach of storms and yet is reached by the hand of man.

There is nothing like an Exhibition to make us feel that powerful human brotherhood which proves that there are no separate peoples as civilization has shed its blessings upon all, and the human mind transformed and enlarged is the common patrimony of all, because every man, though divided by seas and boundless territories, works for some other man. The ironical saying of the comic Roman poet two thousand years ago, is re-echoed today in this building like a hymn of power which subdues the earth: "I am man, and nothing human is strange to me." "Homo sum, et nihil humanum a me alienum puto."

The solidarity in industry, science, and commerce is not for civilized man alone, but even for those who live in primitive barbarism.

Our commercial reviews said lately that the gorgeous feathers plucked by our savages from the birds of the desert were in more demand every day.

Why so much in demand?

Where do they go to?

The British merchant carries them to the mysterious regions of India, and the grandees there wear them with tinkling bells when they enter their temple the name of which is only interpreted through the doubtful knowledge of the missionary.

The link is universal, and the Patagonia Indian, who, sheltered by a rock of the Andes, makes his signs with the point of his arrow, as was done in the age of stone, exchanges his products with those veteran nations, the leaders of the human race, who write their strange characters from right to left after a lapse of six thousand years.

Gentlemen:

We tried a National Exhibition in Cordoba, and now, after ten years have rolled away we try a Continental one in Buenos Aires, on a larger scale, as if foreshadowing that after another decade a future Universal Exhibition shall bear our name, when the call from the shores of the Plate will resound throughout the whole earth.

These Exhibitions will be the milestones along the road to our internal advancement, pointing to the progressive growth of our commercial relations, and the daily increasing size of the shadow we cast across the stage of life.

All the nations of the South American continent are here represented by their products, their industries, and their natural resources. The powerful Empire which has scarcely any competitor in supplying the world with the products of the tropics, and all those nations, including Mexico, in whose veins our blood flows, once like ourselves, Spanish Colonies, and which are with us in that fruitful and tumultuous movements which is everywhere developing their interior prosperity, overcoming distance populating the desert and founding with varied success and amidst tragical or dramatic vicissitudes, though with a constant singularity of purpose, free Governments.

Peru, nevertheless, is wanting. The place of that wealthy and famous city which was called the city of Kings, and which, in its colonial epoch, was the rival opposed by America to the metropolis of Spain, is vacant, but, her absence makes her more nearly present to our S. American hearts.

Bolivia, our sister, is also absent; but we see her from our frontiers gazing from her high mountains and awaiting in her solitude the arrival of the rails we stretch towards her, and till we lord her broad rivers which flow from her mountains to the Plate.

What great progress will be noted by the observer who compares this Exhibition with the Cordoba exhibition, held ten years ago. Peace, without which labour is impossible, rests upon internal security, and if those difficulties inherent to life itself are foreseen, we shall have no further internal dissentions. In the last ten years we have completed our political organization, and enlarged our civilized dominions, taking vast territories and navigable rivers from the savage who held them.

Hitherto, we have not found under our soil the coal and iron on which the general movement of the world depends, but upon its surface, unperceived, lay kaolin, out of which porcelain is made, marble, which we shall soon have by rail from Tandil, to spread upon the pavement of this fair city, whose glorious destiny we have restored by proclaiming it the Capital of the Republic—and the unfathomable lakes of petroleum in Jujuy, with which we shall illuminate the earth unless it be that we enter the field too late as producers of light and find ourselves anticipated by the electric light, which presents itself to-day more as a superhuman thing than born of human intelligence.

All these are new in this Exhibition. But we have others already known; sugar from Tucuman was exhibited at the Cordoba Exhibition as a mere sample:—now it is manufactured in millions of arrobes, supplying half the consumption of the Republic. Santa Fe cereals were merely shown there to prove that the soil flourishes under the foot of the immigrant; but they now afford occupation for fifty thousand men, and are hailed as revealing new markets which come unexpectedly to ameliorate the condition of the labouring classes.

Mr President and Gentlemen

It was known that we produced raw materials, through our universal interchange of such commodities, but the promoters of the Exhibition are desirous of proving us capable of industrial progress, and of showing that our products are numerous and that they are worthy of our efforts. Why should we rest satisfied with having the fruits of industry concentrated for ever in certain quarters of the earth; since labour and industry follow the footsteps of man wherever he goes, there is nothing to prevent their exercise in new countries, even without previous preparation?

The Club Industrial has acted on these views, and it now awaits the verdict of public opinion. It looks to the future. In the inventory of wealth, industry figures in the first place, and the calculation is known by which Humboldt, while seated under the famous Mexican mountains, exalted labour by showing how the shoemakers of France had produced more wealth during three centuries than all the gold and silver that had been extracted from those mines, the wealth of which was considered one of the wonders of the new world. We need to be tradesmen, and must not forget that tradesmen's labour only finds its application in the accumulation of capital scientifically managed, and that inanition overtakes it when not directed by the genius of free institutions.

Gentlemen:

I have referred to the promoters of the Exhibition, and I have a word to say to them.

How many vicissitudes has this Continental Exhibition of the Club Industrial gone through! They have been those of the Nation itself during the last three eventful years! From the very first, public attention was diverted by other things, and the propaganda in its favour was unheard. Means were wanting, and they had to be provided by the promoters themselves, who subscribed from their daily earnings, as the Club Industrial is formed of eight hundred tradesmen, not one of whom is a wealthy man. Finally, the promised end was being reached, the struggle appeared to be ended, and victory was at hand. The mythical Exhibition was at last a reality, it could be seen and touched by the hand, the building was almost ready, when the hurricane came which laid low the lofty structure without, however, shaking the iron will of its builders, who recommenced the work on the day following the catastrophe, avoiding a postponement, and this with an obstinacy which was then called capricious, but which in future will be historical.

Blatant contemporaneous praise is not always the forerunner of true glory; many celebrated events will be forgotten for ever, whilst history will record a date hitherto unknown, the 23d of August 1875—when fifty Buenos Airean tradesmen, moved by the public calamities and by the hardships of private individuals, formed a society for the amelioration of trade and the condition of all classes of society. It was they also who in 1877 inaugurated the Exhibition at the College, to overcome the panic created by the crisis and to show that nothing is lost so long as the working classes remain.

Mr President.

My task is ended. The implements of free labour, the products of our soil, our intellectual advancement and the works of our hands (the first fruits of our awakening industry) are about to be exhibited.

You may say, however, that our producing power has grown beyond all precedent in this part of America and that it will continue to grow in still larger proportions as our numbers swell through immigration, as intelligence is developed through education, and the capital we have formed of our own savings or obtained from the credit we have established for ever, at great sacrifices, accumulates.

While you exhibit our products, you exhibit a young and powerful nation founded upon free institutions, with its internal peace insured, and in the possession of vast territories in which the surprise of empires suddenly born among the forests of North America may be repeated.

Mr President:

I congratulate you sincerely on the inscription of such a day in the history of your administration, causing your name to be associated with the greatest Exhibition ever held in South America.

Gentlemen:

In history nothing is left to chance. Peoples and nations are born under certain conditions of development, which impart to them an indelible character, and only appear to be different in their results, according to the times in which they live, being ever the same in substance. We are the Cosmopolitan Nation of South America. Every language of the earth is spoken in our streets. We call those who come from abroad 'foreigners,' because we have no other word for them in our vocabulary. But the word has lost its meaning with us, for almost as soon as he arrives here, he ceases to be a stranger.

We grow inwardly but we expand outwardly, and future historians will note, in referring to this law of our being, that when Americans determined to be free we carried the sword of emancipation in triumph through three Nations, and that sixty years later, we are the first to convoke those same free Nations to a competition of free labour.

The people of San Martin are the people of the first Continental Exhibition. May that law of expansion in everything that is good, in liberty, in human love, be for ever the glory of the Argentine name, the sign of glory and of redemption which shall cover our faults, and, in the midst of unceasing changes, the never-failing law of our history 'in-manis lex!!'

Burts of applause, renewed again and again, followed Dr Avellaneda's splendid speech. President Roca then rose and said:

Gentlemen:

This festive gathering is one of the many signs of the era of peace and prosperity through which the Argentine Republic is passing.

Hardly is it emancipated from its internal dangers and troubles, when its spirits revive on finding itself the ruler of its own destinies, and that sentiment of American fraternity which burned in the hearts of the founders of our freedom, who could think neither of liberty nor independence except as a boon for the whole Continent, revives in an Industrial Society with other ends and purposes, on these same banks of the Plate.

This Tournament of Labour, the second I have had the honour of inaugurating during the short time I have been in office (both due to private enterprise) apart from its importance from a material point of view, owing to the number of articles exhibited, the variety of trades represented, the different products of the soil, and of man's ingenuity, and the different countries represented, has also a high moral significance which opens up new horizons for the material progress of this part of the continent. It is the first step towards the community of the Nations of South America, which, from the vast sphere for their development and their countless riches

Can be used with COLD WATER. Sole agents MOORE and TUDOR. BEWARE OF IMITATIONS AND FALSIFICATION.

are destined to bear aloft some day the torch of liberty and sustain the responsibility of human culture and civilization,when other peoples and other races shall have accomplished their journey, like the East Greece, Rome, Europe, and to-day North America, following the immutable laws of History.

The idea of a Continental Confederation, a generous dream, the persistent aspiration of all the great thinkers of the new world, has not failed so often because of its chimerical nature, but owing to what was sought being political rather than material association.

The links of a common race, the community of institutions, the identity of language and blood are not sufficient motives for the perpetuation of close and sincere alliance among nations. The community of interests, the connection of mercantile relations, the emulation of trade, and the continual interchange of products are necessary to draw nations together and to abolish their frontiers.

What was foreseen by the gigantic spirit of Bolivar; what was conceived by Monteagudo on the eve of his death; what was desired by the Panama Congress of 1826 and by the Congress of Lima in 1848—all the attempts at American federation, which have hitherto failed, are realised to-day, at last, though imperfectly as yet, on the borders of the Plate, the starting-point of the greatest evolution in South American history.

The union of the two countries will be effected, not by victorious battle, but by the conquests of labour, and it is in their fruits that we must seek reciprocal well-being. Had we convoked a Congress to give a form to that decree for union which has had such brilliant interpreters, we should not have seen here one-half of the representatives of the Continent.

Distrust, jealousy, rivalries, would have frightened some and kept away others.

But in this Assembly all the American nations are represented excepting those which are afflicted with the calamities of war, or which, owing to the great distance, have not been able, in so short a time, to make due preparation. Here are Mexico, Venezuela, Brazil, Chile, the Republics of Uruguay and Paraguay, which have responded to this call of amity and of peace, although uttered only by a society of tradesmen of different nationalities who have made their home here and mixed with the mass of the people, by that irresistible levelling power of democracy found in young countries that are full of promise—a force which so exalts the human race that it makes all equal before society, before the law, before the right and before God.

Gentlemen,

I accept the honourable duty imposed on me by the Association which organised this Show, and which has just been confirmed by its Hon. President, and, thanking, in the name of the Argentine Republic all the friendly nations that have aided us with their products, I declare our first Continental Exhibition open.

At the conclusion of President Roca's speech, there was a general stampede, and the President and party were shown through the Exhibition by the Committee. Our reporter followed as best he could, but the crush of the public after the Chief Magistrate's party was so tremendous, that he lost his best hat and every button on his coat and waistcoat in the struggle. The following is a precis of what he saw, but it will require a good fortnight to inspect the whole Show, and we still have much in reserve for future day to-day reports.

THE GALLERIES.

As you enter the Exhibition, by the Calle Rivadavia, the first object that strikes the eye is an electric lamp with the electric wires insulated, and in the large vestibule you see on each side statues of a small size, with as many artistic defects as possible, enhanced by the fact that they have no pedestals. Boerhave looks a thorough Dutchman, in a species of attitude that is neither graceful nor natural—Sydenham and Nelaton are better: these marble statues were made in Genoa. The vestibule is covered with an ordinary carpet, and the surroundings do not impress one much with any admiration for the taste of those who arranged it. As you turn to the left you enter the section of the capital, a large Parisian 'magazin' or bazaar, with every imaginable thing in it. The exhibits are tastefully arranged, and certainly many of them are admirable. We remarked ladies' stays, dresses, ornaments, etc. The dresses are exceedingly gaudy, too much so even, and some of them have been made by ladies in town. The finest exhibit in the capital section is a magnificent set of furniture, made of Chaco wood, which is really worth looking at: it is the finest furniture we have seen yet—the maker is a Frenchman, and his skill and taste must be admired. The colour of the furniture is very sober and the wood beautiful. Paris could not produce anything superior.

At the end of this wing, next to the capital, come the machines. Only one corner of this department is open to the public: through the interior you catch a glimpse of the large sugar-machinery of the Fives-Lilles, just opposite M. Schwartz's large 'poso-surgente' in the patio, worked by steam. Here and there you see pumps, engines and an electric machine. Connected with this department is the large concert-hall, opening on the yard, which is in rather a muddy condition. Corti-Riva's kiosk attracts the attention of all, owing to the thrashing-machine working: this idea of working the machines before the public is an excellent one and might be imitated by others. Messrs. Drysdale have a fine kiosk full of iron implements and ornaments, garden chairs, etc. Close by is the Confiteria del Gas and that of M. Labordette: there is not much 'cuisine,' and nobody need expect a heavy dinner in the precincts—therein we find one of the great mistakes of the committee. The public should be able to breakfast and dine in the Exhibition; in fact, pass the whole day in the gardens. In the second yard, the Artillery Department has a magnificent kiosk, with two cannons, swords, lances, shells, all made in the Parque. The finish of these weapons reflects much credit on the department.

Bieckert's grotto, the two windmills and the horticultural garden are specimens of a widely different nature; beer, wind and plants. One windmill is exhibited by Messrs. Drysdale: it is the larger of the two and produces an agreeable effect as it works. Just in front of the artillery kiosk, under the Central gallery is a fine bronze statue, cast in the Parque, The attitude of the soldier, threatening, sword held high, a back-hand thrust is splendid; the statue seen in front may be stated to be perfect, and far superior to Alsina's in the Plaza Libertad; but seen from behind you note a defect in the right leg, the thigh being altogether too long, compared with the left. On the right side of the statue you enter the gallery of fine arts, the 'galleries des croates', the gallerie Apollon of the Louvre on a small scale There are one or two good oil-paintings in the surrounding-rubbish. One oil-painting attracted some notice, owing to the attempt of the painter to achieve something original: it represent the moon in the desert, the beams casting a lunar color on the surrounding landscape and on Pincen or Catriel its philosophical observation: the attempt is praiseworthy, but the results are not much. The yellow-fever painting is good as far as regards the prostrate woman; she looks real, dead before you. Mr Blanes, the painter, we think, should send this painting to Brussels, Paris or Antwerp. He would get 10,000 francs immediately for it. It is a painting worthy of an European museum. The statuary is simple miserable; the attempt to represent America, a young woman, in the Argentine section, is simply abominable; this modern Indian Venus should be removed: she is built on angles, all curves neglected: the limbs are sparse and the statue is a shocking attempt at anything æsthetical. All the portraits and busts of General Roca are so many failures; none have succeeded in correctly gtving the general's expression. We won't mention his bust, close to his life size portrait; whoever made it, should be fined for the thorough contempt of the public in exhibiting same. In the statuary line there are two black slaves very correctly rendered.

Passing from theGallerie Apollon, you enter the Argentine section; the most beautiful part of it is the ceiling, and herein we reeognize a master hand; but the arrangements below are faulty: one can see that the exhibits have been huddled together quickly, without plan whatever. The provinces in this section make a good show, better in one opinion, than after Buenos Aires, or the capital. They are fine as original industry, no attempt to imitate the Parisians; the lace, the dresses, the saddle, all constiture the genuine national industry. The wines of Mendoza looked tempting, but unfortunately nobody is allowed to taste them; and this happens when they irrigate the streets of the Cuyo cities with the grape juice. There should be a little more discrimination on the part of the exhibitors; they would consult their interests if like Bagley they distributed their exhibits and let people taste them. This is the time to see if the native wines are good and there is no better advertisement in this line than the palate. This Argentine section is the gem of the exhibition, and we are sorry that we are unable to give a full description of same. We advise the committee to place more chairs about for the ladies. It would be too long to mention the other sections; the British, French, Brazilian, etc, are not yet finished. In the agricultural department we noticed a magnificent display of machinery by Messrs. T. Drysdale & Co.; next to Drysdale are the machines of Messrs A. Forrester & Co; the machines are pretty numerous; Messrs S Shaw have also a machinery department in the same section. Messrs Gregoire & Co. exhibit a beautiful little French threshing-machine. But we will devote a special report to these departments one after another. As it is, a visit to the exhibition is really a treat, and one leaves astonished to see the progress of the Plate. Very many sections are yet far from complete, and we refrain from mentioning same for the moment. We can inform our readers that they will simply be astonished to see the palace, and all should come forward now and visit same. There are no fears of fire, with Mr Schwartz's well and the fine pump of the Bomberos, and one can safely assert that all who examined the precincts withdrew satisfied that the industries of the country are progressing fast.

At 5½ p.m. Pres. Roca had 'done' the whole Exhibition and took his place at the main entrance to see the troops march past. This proceeding was over in half an hour, and the President and party drove home to dinner. At night, when lighted up, the Exhibition looked superb, magnificent inside, but outside at least treble the number of lamps are required. Buenos Aires (province) carries the palm in the lighting up way.

At night the Plaza Victoria, all the public buildings, many hotels and cafes and numerous private houses were illuminated. In fact the citizens, high and low, made the day and night one of genuine and spontaneous rejoicing, and it is quite clear that Buenos Aires is satisfied with and proud of its first Exhibition.

EDITOR'S TABLE.

'You deserve to be hanged from the highest point in the Exhibition!' Such was our greeting from a prominent member of the Industrial Club as we entered the Exhibition on Wednesday. We thought of our absent chief, and how his proverbial luck had kept him out of the way when matters had reached a hanging point, and, after a short interchange of ideas, (as our Argentine friends say) found that the Club man was labouring under an impression that the *Standard* had all through been an opponent of the Exhibition. It took us half an hour to convince him to the contrary, and even then he looked so dubious that it was a relief when another member of the Club came up and said, 'Never mind; should he string you up I will stand by to cut you down.' After this we all 'smiled' together and everything was serene. The whole town admits that the Exhibition is a great success. We give as long a description of Wednesday's doings as our space admits of. We feel quite ashamed of our colleagues for working on the greatest holiday this country has ever seen. Every paper in town appeared yesterday morning except the *Courrier de la Plata*, *Patria Italiana* and *Standard*. We feel proud of being one of the trio and that we resisted all inducements to work on such a great National festival.

Saint Patrick's Day. We salute all our Irish countrymen in the Plate on their National festival. We remind all those in the city that there is High Mass and sermon at the Merced this morning.

The Rev. James Smith will preach next Sunday at the Cabaña, district of Canuelas, at noon.

The Rev. Lachlan McNeil will preach in the Scotch Church in town on Sunday next, morning and evening, at the usual hour.

Mr Hutton, master of the Scotch School, is to be found at 125 Calle Juncal.

The Exhibition has so engulphed our space this morning that we are obliged to give our Montevidean Letter and part of this 'Table' back seats in the Supplement.

Mr John Thompson, son of Mr William Thompson of Dawsbury Road, Leeds, is requested to communicate his address to Her Majesty's Minister here.

The sandwiches gave out at the Exhibition on Wednesday at 2 o'clock, so ferocious was the public appetite. Kramer would have given his head for a couple of hams at 3 o'clock, but could not get them for love or money At 3½ p.m. the tongues and roast beef were all finished, but the beer held out till dinner time.

The police did their duty well at the Exhibition. It is rather startling, however, considering that all the visitors were invited, to read that a young man from the country (Catamarca), had his gold watch picked from his pocket.

Our telegram column being also demolished to-day by the Exhibition, we put the foreign items in a nutshell.—French Committee of Deputies recommend Divorce Bill. Towns of Alajuela, San Ramon, and Heredia, in Costa Rica, destroyed by earthquake. Several thousand victims. *Times* reports Russian volunteers pouring into Bulgaria. Panslavists promoting a general insurrection in Macedonia. At Cardinal McCloskey's instigation, the Catholics of North America have asked the Pope to change his residence to Quebec, Canada. Agitation in Ireland continues. Parnell has been condemned to remain in jail for trying to bribe the warders to wink at his escape. Mr Logan is the new U.S. Minister to Chile; he was there before in 1866.

Business in the market to-day was at a discount, and nothing was talked of except the Continental Exhibition, the new Provincial capital and the good news from Havre about the wool auction. The new capital in Tolosa is a foregone conclusion, and the realization of the Provincial dream may not be far off; the new capital can soon boast of an excellent harbor for ocean vessels, and people think that this will lead to a speedy expropriation of the Riachuelo Works. The Provincial Government will take about 60,000,000 m/c for the works and all the labour of the National Government must be directed towards making the Riachuelo a first class harbor. Tolosa as capital means the establishment of branch lines of railways to the Great Southern Railway and Western Railway and a contest must necessarily arise between the two neighbouring capitals as to whom is to get the shipping and wool trade. All our barraqueros will have to establish sucursals in Tolosa, and a new Bolsa will give employment to many of the brokers on Change. It is much to be feared that the Tolosa effervescence of the moment will be a nine days' wonder and then die out of the public and official mind.

There was no market to-day and no operations in gold were made in the hall. People seem to be resting after yesterday's exertion and exhibition worry. There are hopes of more active business in the market, but a fresh failure is rumoured in Sta. Fe; up to the present few seem to know anything about the matter except that the news is spread on Change. Much importance is attached to same for speculating purposes.

Cedulas are weak; the emission of Series E up to present must be about $2,000,000, and the market expects millions more to speculate in. This speculation in fact is a boon to the Bolsa, since so many brokers have withdrawn from the National Bank Share market; it always gives employment and is a more speculative paper for the moment on Change than any other. Operations continue pretty active, but the market is weak, owing to the heavy amounts offering. In Series A nothing is doing. Holders offer large amounts at 100½, but there are no takers. Rates of Series E for the end of the month opened at 85 and fell to 84½; the market closed at this rate with a weak feeling.

Nothing could be duller than the National Bank Share market. The lats unpronounced feeling of the stock continues, but it is generally whispered that if the bulls can get together enough money, say 600,000 pats, they can drive the market up to any price. The bears say that one of the Syndicate is about to sell 5,000 shares, and that the Italians in consequence must prepare to let the market go or take up same. The bulls naturally laugh at this. Everybody nearly believes that there is still a 'descubierta' of over 10,000 shares, and the corner must come sooner or later. The Italians cannot let go unless they wish to commit suicide and let the market drop to price beneath those that followed the November liquidation last year. Operations to-day amounted to 570 shares only; the market opened somewhat weak for the end of the month at 123½, but rose subsequently to 123¾ and closed dull at 123⅝. The operations are very insignificant and little interest is shewn in the stock, but this fortnight promises to be lively.

Everybody on Change was talking of the telegrams from Havre. More importance is attributed to the fact that ¾ of what was offered sold, than to the rise of 5 centimes. It was stated that owing to the news over 90,000 arrobas of wool were sold from deposit to-day. Shippers were in the very best humor, and steamskagents now see plenty of bales to fill the holds.

Nothing has as yet been decided on the Municipal Debt since the last meeting of the Corporation with the Minister of the Interior. A Committee, composed of Messrs Walls, Rodriguez and Mulhall had been named to study the question, in order to report on same, and inform the Minister, but owing to the absence of one of the Committee nothing has been done in the question up to the present. There is, nevertheless, an intention of seeing the Minister soon on the matter.

Messrs Baltar & Quesada sold during last year:—

Propiedades urbanas	$19,914,700
Do rurales.....	13,074,551
Hacienda	13,498,194
Mercaderias generales ..	5,707,100
	$52,194,545

The firm spent in advertisements alone $493,740 m/c. Messrs Baltar & Quesada are the Tattersalls of the River Plate. The figures eloquently shew the prosperity of the establishment. Mr Quesada has now the hammer in hand, and we augur for him the greatest success.

The sales at the ring were as follows:—

Gold—
No operations.
Cedulas—
For March 18th E 10,000 84¾
For March 31st E 110,000 85–84¾
For April 30th E 20,000 84¾–⅞
Sales, 140,000.
Nat. Bank Shares—
For cash 22 shares 123½
For March 31st 550 shares 123½–¾–⅝
Sales, 572.

Fair amounts of exchange were done to-day at the following rates:—

5.21, Francs
49⅞, London
4.22, Reichsmark.

The Italians took large amounts of exchange at the Provincial Bank on Genoa.

6,000 Series A were sold this afternoon for cash at 100½.

14,000 Series A for Saturday at 106¾.

Discounts in the market continue without change.

17,000 arrobas of wool arrived in the Plaza Once this morning; all sold at high rates. The sales in the deposits are very large, and buyers are principally Germans.

Cablegrams were reported on Change from London, giving a rise of ¼d at the wool auction. This news with the rise in Havre has led to increased business in wool circles and high prices. Artistas received telegrams this morning with orders to buy within limits of 5 to 5.25, but prices in the market at present are at 5.25 to 5.50 in francs. Nevertheless many artis as, who had already packed their trunks, have suspended their departure, in view of the good news and will soon re-enter the market.

Business at the South Plaza is very brisk. All the arrivals are moved off immediately at high rates. Mr Prader's wool from the Pillahuine was sold the other day for $108 per ar.; this wool was generally praised and is some of the finest that ever entered the Plaza Constitucion. Wool-men expect higher prices next week, but buyers, especially the Germans, are cautious in their operations. Meantime the deposits in the Plaza Once are emptying fast.

Three houses involved in the Antwerp failure are now busily engaged making arrangements with their creditors.

Advices from Santiago del Estero announce heavy mortality amongst the cattle. The drought in that province is very severe.

The Cordobese are trying to launch a tramway company from the Rio Segundo to the Villa del Rosario. The company will be formed up in Cordoba. We doubt very much if they will ever be able to get the money together.

The Water-supply endeavors in Flores progress very slowly. If the neighbors of the village do not show more interest in the question it is very probable that no water will be had at all. The wealthy men of the locality should step forward and contribute to the desired purpose.

Wheat in Rosario has fallen greatly since the large shipments to this port. The wheat is now selling at $14 m/c per fanega, on an average.

The German bergantine Mary has been chartered to load in the Uruguay jerked beef for Brazil at 4½, 5½, 6½ rls and 5 per cent.

There is some demand for borrega's wools in the plazas for Belgian and French account; nearly all that arrives is sold and bought by Belgian 'artistas.'

The extension works of the Central Argentine Railway to the mole in Rosario are advancing very slowly: he rails have not yet been placed, and some time will elapse before they are.

The Parana is still rising, but the 'crecients,' it is anticipated, will not be as great as last year. In 9 days the river has risen 14 inches: several islands near Rosario are covered by the waters.

At afterhours about 75,000 Series E were sold at rates fluctuating between 84½ and 84⅝. The stock was firmer, but the speculation was dull. In National Bank shares some 1,500 were sold for the end of the month at 123⅜: the market closed firm at this price.

Mr Thomas, according to a native colleague, has been named chief engineer of the extension works of the Tucuman Railway. The works are progressing, and the workmen expect to finish piercing the first tunnel before the end of the month.

500 barrels of sugar were sold in Montevideo to-day at reserved rates.

The Sales at afterhours were—

The following clearances are reported:—

Ital. barque Richetta for France with:—
10,381 bags linseed
644 linseed cakes
83 bags beans
Span. lugger Bestabe for Rio Janeiro with:
269,000 kilos jerked beef
Span. barque Guayaquil for Cuba with—
276,000 kilos jerked beef.

The Custom House has collected up to the present 701,000 pats; the returns this month promise well. It is strange how high the Custom House receipts are in view of the general stagnation of imports in the city.

4,000 salted novillo hides from Rocca & Co.'s of 65 lbs., have been sold at 47⅛ rls. gold.

3,000 salted hides from Luro's sold at reserved rates.

The Span. barque Monjince has been chartered to load 5,000 qq of jerked beef for ports of Brazil at the Magdalena saladero; rates 4½, 5½, 6½ rls. gold per qq. and 5 o/o.

Heavy sales of wool go on in the Barracas deposits; no doubt the result of the Havre auction has given fresh impetus to the business.

The complaints with regard to the valuation of the Contribucion Directa Tax are already loud and plenty of work awaits the gentlemen on the juries. The Municipality and the National Government have now requested those juries to sit and attend to the different claims of the neighbors. As regards the jury of patentes the following gentlemen have been named by the Municipality to fill the usual numbers of members:—

M Forrester
S Dussand
A Bullrich
C Zuberbühler
T Ambrossetti
R Rigal

These nominations answer the wish of the Municipality to be thoroughly impartial.

Talking of the Municipality, the Lord Mayor has called for bids within eight days to pave the two boulevards Callao and Entre Rios. These streets are the finest in the city, and the neighbors may anticipate a speedy end to mud and dust.

There is a new electric lighting project on the tapis; we think all these proposals should go to the Exhibition, where a competant jury will decide on the best and cheapest systems. In the Exhibition we remarked several electric lamp batteries and wires all ready for work.

The Montevidean brokers are in the highest spirits, entertaining hopes that the Deuda Amortizable will be quoted on the B. Aires Bolsa. The speculation in the stock down there is heavier than that in Series E up here. Yesterday upwards of 400,000 pats of Deuda Amortizable changed hands, and the speculation seems to be on the increase. The rates are 19⅜ for cash and 20½ for the end of next month. The quotation of the stock on the B. Aires Bolsa is expected to lend it additional value. The petition in the matter has already been presented to the Camara Syndical, but nothing as yet has been determined.

The Colombo arrived in Genoa on the 28th of February; the Nord America arrived in that port on the 3rd inst., and the Europa left the same day for the River Plate.

The Exhibition shews the real advance of Sta. Fe and some of the Argentine provinces. We saw alfalfa from Mendoza of really incredible length, and some hundred bottles of various seed, sent by the College of Sciences of that province.

Our camp readers should bear in mind that the Contribucion Directa Tax must be paid before the 31st inst.

The Municipality on Tuesday took the lottery bill into consideration. After some few preliminary remarks of the President of the Corporation and of its members, it was resolved to name a committee to superintend the direction of the lottery. The very best men in the city were named for the purpose; the lottery committee is to be composed of Messrs M Guerrico, F Sassemberg, C. Urioste, A. Marco del Pont and E. Frias. These gentlemen are a guarantee to the people that the lottery will be well conducted. This lottery has been a long felt want, and far better for Porteños to spend their money fostering their own charitable establishments than those of other Provinces and other Republics. The splendor of the Caridad Hospital in Montevideo came out of the pockets of the good people in B. Aires, who must gamble their money some way or another, on the turf, in the Clubs, or in the lottery. The lottery here will soon begin working, 10 o/o of the proceeds should be put aside for the sake of the Municipal bondholders.

The news from Havre about the auction that began the day before yesterday is favorable. Prices on an average show a rise of 5 centimes. As only 7,000 bales are offered at auction, little importance can be attributed to same, but at all events the news has come like a gleam of sunshine among the wool-men; a rise of one centime even would have been greeted in the present dull state of the wool market, at least in the Once. We can hardly believe that the small arrivals in the North Plaza reflect the small stock of wool in the north western camps; it looks more likely as if the consignatarios had given the sheep-farmers instructions to send in their stock slowly. Many, nevertheless, think that two months hence there will be no more wool, and we may consider April the close of the season. The telegrams from Havre influence the prices in this market much more than the London advices, although it must necessarily be deduced that the prices in Havre are dependent on those at the London wool auction at present going on.

The Message on the capital was finally presented to the Honorable Senators of the Province; the document is altogether too long for the columns of any newspaper; the Secretary took four hours to read the document to the Chamber. The principal point of the Message is that Ensenada is the best spot for the capital, that 6 leagues of land are to be expropriated and laws passed for the construction of buildings, provission of water, gas, sewerage, &c. We think that Dr. Rocha has hit the nail on the head in his message, and the new Provincial capital promises to be erected on the very grandest scale. The costs of expropriation are to be covered by the law of 6th June 1881. The foundation stone of the new city is to be laid as soon as possible, and the day will be declared a strict holiday. The new town should be called Rocha, after the name of the founder of the new city. The Bill has gone to two committees of the Senate, and everything looks as if the new capital after all is not to very far off from realization. The message is that of a statesman and Governor Rocha is to be congratulated on the ability displayed in the document.

Venderemos al mejor precio, al contado y sin retirar lote las 30 hermosas yeguas a que nos referimos; respecto de las que solo decimos (haciendo su mejor elogio) que son propiedad del famoso Stud Las Barrancas del senor Don Patricio Reid, regenteado por el senor Don Diego Church.

Los animales que hoy ofrecemos debieron ser vendidos en el gran remate del Stud, no pudiendo hacerse asi por razon de la lluvia que desgraciadamente interrumpio la operacion

Al anunciarlos hoy, llamamos la atencion de los aficionados a buen sangre en animales de carrera; y muy especialmente a todos los Sres criadores que deseen poseer los mas lindos animales que existen en el Rio de la Plata.

Las yeguas son todas ellas preñadas y con cria al pie y han sido servidas por los famosos padrillos del Stud Sutherland y Young Fritz, y estaran a la vista en el local indicado el dia del remate desde las 5 a.m.

On Wednesday, March 22d.
At 3 p. m.

At our mart San Martin 51, we will sell to the highest bidder (on above conditions) this splendid camp situated only 13 leagues from the town and surrounded with important establishments.

The camp which we offer for sale is only 5 leagues distant from the line of railway to Bahia Blanca, and is known and reputed to be covered with good class of pasture, the greatest part of it, tender grass; There are also several lakes of permanent sweet water on the land.

The conditions of sale are very advantageous with regards to payment, and for this reason we beg to call the attention of speculators in camp to this sale.

The buyer can take over 8 Bills due to Government, $186,680, i. e. $23,336 each.

The land laws allow the postponement of payment for one year on payment of 1 per cent per month interest.

51—San Martin—51

We will sell to the highest bidder over and above the stipulated basis, for cash, 8¾ league of splendid camp, in the department of San Justo, (Province of Cordoba). Advices we have received about the above campare most flattering—so let those who wish to secure good land cheap, look alive.

The shape of the lot, its rich pastures, and the liberal conditions on which it is offered for sale (in one or more lots), place it within reach of agriculturists, who require small lots of excellent land.

The low valuation put on this land compared with the prices obtained by the Government, 3,060 pats, is the best recommendation we can offer.

'Bayard' y 'Municipal' de sangre puro fueron introducidos al pais por la compañia, comprados en el castillo 'Mille Secousse' cerca de Burdeos, *Presidente* tambien puro nacio en el establecimiento 'Matanzas' arriba mencionado.

Cremos inutil entrar en mayores detalles sobre la cria Percheron que es una de las razas mas convenientes para la cruza con yeguas del pais, pues son animales fuertes, elegantes, fogosos y al mismo tiempo de una docilidad que no se encuentra en ninguno otra.

Tenemos una prueba de ellos en las varias yuntas que se ven en las calles de la ciudad procedentes de la cria del Sr. Cambaceres, unico criador de la raza que ha espedido hasta ahora sus productos al publico.

La Compañia del Tramway hasta la fecha habia unicamente espuestos sus crias en varias esposiciones, obteniendo siempre premios, pero sin ofrecerlas en venta; hoy que lo hace, tiene en los criadores una brillante ocasion para hacerse de animales de primer orden.

Los caballos y yeguas pueden verse en las caballerizas de la compañia en las 5 Esquinas y dos dias antes del remate en nuestra casa Alsina 78.

THE STANDARD—Printed and published every morning at the *Standard* Printing Office, 54 Calle Piedad.

MONTEVIDEO.

Hail to the Pocitos in wet weather—as Andrade says 'salve zona feliz'—on the habitable globe there is not a bleaker spot than the Pocitos on a rainy afternoon; the baths are locked up, the tramways empty, some few incorrigible bathers run down not to lose their afternoon bath, but even the very policeman is not to be seen about. I have just come from there; the waves were mountains high, and if I except my wife and two nuns there was not a lady in Montevideo with courage to bathe in such a storm. It is now teeming rain, and Montevideo is infinitely worse than Buenos Aires in wet weather; the storm has held here since Saturday afternoon, and it looks as if it is going to hold out the whole week. It will be a terrible disappointment if the storm continues to-morrow, as there will be no steamer for Buenos Aires, and all the flowers and all the passengers for the exhibition will remain behind. In nearly every shop window in the chief streets I saw beautiful garlands of flowers worked with the greatest art. Roses and flowers as General Roca says should be the only interchange between the two countries. That telegram of President Roca has had the run of all the papers here, and some have made leading articles out of it.

The rain is coming down so hard that there is no picking up a word of news to send up, so I suppose there is nothing else for it but statistics, a fountain for a newspaper editor that really never runs dry, and, when handled with ability, statistics may be made most readable and interesting matter. I have already got together many figures about the country, which are really as instructive as amusing. Thus for instance Montevideo imports more fariña than the whole Argentine Republic, and still stranger to say, the Banda Oriental estancieros, to judge by the fencing wire consumed, have fenced as much land as B. Ayres and all the Argentine provinces.

Imports Wire	1881
Montevideo	434,889 bundles
Argentine Republic	433,790 do

When we consider that the total estancia area of the Banda Oriental is not 5000 leagues we can judge how far ahead of us are its estancias.

But perhaps a still more interesting feature is the rise in Montevidean stocks last year, it shows an increased capital amongst the holders of these debts of 2,794,137 pats or Nat. gold Dollars. The rise in some of these stocks last year is very remarkable and goes to show how things are on the mend down here. I give a few of the quotations, as it may interest the Buenos Aires market—

Montevidean Bolsa 12 per cent rise
East Uruguay Railway 14 do
Mercado Puerto 16 do
Tram Union 20 do
Tram Paso Nolino 18 do
Commercial Bank 23 do
Consol 1880 11 do
Deuda Internal 1st 10½ do
Deuda Amortizable 11 do

The Plaza Ramirez Tram Shares that were down to 45 are now 85, and the Pocitos Tram Shares have risen from 35 to 60.

The Commercial Bank Shares, considered one of the best paying stocks in Montevideo, have risen from 85 to 108.

The rise in the price of public stocks is most instructive and evidences clearly the returning confidence in the country and its very improved credit; here's th list—

	1880	1882
Emp. 1st Series	30¼	40.97
Do 2nd do	27.75	34.90
Pacificacion 1st do	25.20	35.70
Do 2nd do	27.50	35.73
Rescate	28.40	35.—
Deuda Fundada	26.34	34.60
Tit Adicionales	26.25	34.20
Consols 1872	20.25	26.87
Deuda Extraordinaria	19.—	28.95
Interna, 1st Series	23.93	33.40
Do 2nd do	16.94	24.25
Tit. Especiales	5.46	8.18
Franco Ingles	85.85	94.—

It will be seen from the foregoing that all along the line there has been a splendid advance, and we hear of a Brazilian gentleman who in 1880 made large purchases of these stocks and has added handsomely to his invested capital.

EDITOR'S TABLE

(Continued from third page)

The offices of the *Southern Cross* have been removed to the Pasage Argentino, opposite the Merced Church. We are sorry to lose our colleague from Printing House Square.

'Coming events cast their shadows before.' The Western Railway is going to run a branch to Ensenada. It is easy to see where the future capital of the province is to be.

The *Telegrafo Maritimo* addresses an editorial epistle to our chief in Montevideo, in reference to his suggestion as to B. O. getting a loan of Dr Plaza to put its financial house in order. Our esteemed contemporary does not seem to like it at all.

The *Prensa* mentions that Mr Manuel Eneas has in hands a project for freezing fish in Montevideo and sending it up here as fresh as when caught. We hope the business will succeed. People here do not eat half enough fish and should cultivate a taste for it, as it is preeminently brain-nourishing food. Half our blunders in public affairs here are due to the fact that B. Aireans are not an oyster and lobster-eating people.

We regret to announce the death of Don Juan F. Gutierrez, father of our esteemed colleagues the editors of the *Patria Argentina*. The sad event took place on Tuesday, and the funeral, which took place yesterday, was very numerously attended. It had to be postponed on Wednesday, as every carriage in town was hired for the Exhibition.

'Palcos' in the National Theatre are rising in value. Mr Santa Maria paid $80,000 for one the other day, cash down on the nail, whereas the previous price was $75,000 at as long and easy dates of payment as provincial Governments allow to buyers of estancia lands.

Of course! The old stick-in-the-mud story. Although the Western Railway announced, like all the others, a reduction of 25 per cent in fares for the Exhibition, those who travelled on the line on Wednesday had to fork out the usual fare, as the station-masters along the line had not been 'officially' informed of the change. Just so! Red tape for ever!

The energetic Minister of the Interior is already getting his Memoria up for the meeting of Congress, which is not so very far off now.

There was a tremendous 'fiasco' in the Chambers on Wednesday. The Deputies, in spite of the attractions of the Exhibition, elected to sacrifice themselves for the good of their country and met in full quorum to receive Govsrnor Roach's Mammoth Message about the new Capital, but, after cooling their heels till 1½ p. m. and the Message being still invisible, they broke up and started for Plaza Once. There was a deal of grumbling, but we really believe that Dr Roach did it on purpose, in order not to deprive the Deputies of the pleasure of attending the Exhibition.

Chivilcoy intends to have 'aguas corrientes,' at a cost of 40,000 gold patacons. Dead cheap for such a luxury.

The new Governor of Misiones, Colonel Roca, is losing no time: He has already promoted a saw-mill up there, and some timber from it has come down. The forests of Misiones are practically inexhaustible.

The Lord Mayor has another new Boulevard in his energetic mind. It will start from the Red House, along Paseo Julio to Callao, along that street and Entre Rios to San Antonio, then to North Barracas and the Boca, and then back to Plaza 25 de Mayo. This will beat the Calle Rivadavia business hollow.

Oh! Ladies, here's the latest freak offashion:—"We are threatened with all sorts of horrors for spring wear. Huge patterns are said to be in preparation for the new sateens and cretonnes. Full-sized dinner-plates are but an item in the list. Oats catching mice, pug dogs, and foxes' and horses' heads are to be among the objects with which the new *mode* threatens to enliven spring materials."

A Quilmes subscriber called on us yesterday to enquire if the Society for the Prevention of Cruelty to Animals had burst up? Not at all, but the members are all busy writing poetry for the 'Juegos Florales' at the Exhibition, and cannot attend to animals just yet. The case is this. At Quilmes there are constantly at work, pumping water for the railway, two mules with sore backs and sore sides, driven by a dreary boy with one leg, which is probably sore also. The plethoric supply of provender allowed to these poor mules is one fanega of maize each per month; what the boy is allowed we have not heard; but our informant tells us that the unfortunate trio are in a very bad way indeed and worthy of compassion.

The 'asunto Stump' has taken another twist, and the 'protagonista' is again under lock and key. The 'declaring' business in connection with the affair appears to be going on as hard and fast as ever.

Dr Noailles, L L D has thrown up his brief in the case of the 'cocheros' *versus* the Municipality. Poor cocheros!

There is a split amongst the members of the Progreso Club about allowing the Damas de Caridad to give a charity ball in their saloons. There is no split however about the grand May ball, which the members are determined shall surpass any ball hitherto given South of the Line, even that given by the British residents to the young Princess.

Quite a lot of visitors to the Exhibition arrived here in the steamer from Rosario on Wednesday morning. All over the Interior there is quite a pow-wow about the Exhibition, and in Rosario the Government employees have been promised a holiday turn about, to see the show.

No falling off in suicide. Another is reported from Montevideo—victim a youth named Marino, and cause love.

All bid for will be put up to auction and the buyer may claim 30 lots adjoining at same price as be paid for first lot.

No person or Company can buy more than 30,000 hectareas.

The price of the land must be paid one tenth part cash and the remainder in 8 equal parts, one of which will be payable at the end of each year. Buyers must sign Bills for these instalments.

Should the Bills not be paid when due, the Land Office can enforce payment or declare the contract void, the buyer in this case forfeiting his first instalment.

If the amount of sale is paid cash, or, if at any period it be found convenient to pay the instalments not due, a discount of 6 per cent per annum will be allowed on said instalments.

The survey of the land must be paid at the rate of $1 m/c per hectarea.

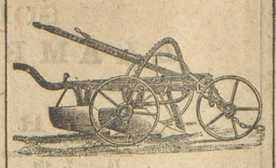
HOWARD'S CELEBRATED PLOUGHS

Howard's Double Plough.

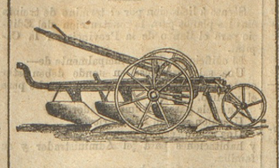


The above implement effects great economy in the time and cost of ploughing, and its success has been very marked wherever it has been introduced. The depth of work can be regulated by the lever as the plough proceeds, and at the ends, the plough is lifted by the same lever clear off the ground.

The implement is so strongly constructed that in the hands of Kaffirs it cannot readily be injured.

With steel breasts.....
With steel breasts butwithout coulters
Weight 4½ cwt.

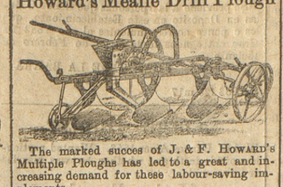
Howard's Triple Plough.



This is similar in construction to the preceding implement, but made to take three furrows. It may at once be converted into a Double Plough by the removal of the hinder body, and this is sometimes desirable on ground where the draught is heavy.

With steel breasts.....
With steel breasts but without coulters.....
Weight 6½ cwt.

Howard's Mealie Drill Plough



The marked succes of J. & F. Howard's Multiple Ploughs has led to a great and increasing demand for these labour-saving implements.

In addition to the economy effected by their use in time and wages, their usefulness has been materially increased by the addition of a simple drill which deposits the seed in the middle furrow, where it is immediately covered with the earth raised by the next plough share.

By this means the cost of sowing is avoided, and no seed is wasted by being exposed to birds or vermin, nor is it trodden by the draught cattle. The seed is moreover sown at a uniform width and depth, and thus a regular growth of the crop is insured.

With steel breasts.....
With steel breasts but without coulters .....
Weigth 5½ cwt.
Maize Drill, £1 15s. extra.

The above Machines kept in Stock by the Principal Hardware Merchants.

Dysentery, Cholera, Fever, Ague, Coughs, Colds, &c.

Dr. J. Collis Browne's Chlorodyne

(Ex Army Medical Staff)

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION.—Vice-Chancellor Sir W. P. Wood stated that Dr. J Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's.—*See Times*, July 12th 1864.

The Public, therefore, are cautioned against using any other than

Dr. J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever, Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism. Gout, Cancer, Toothache, Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 5th 1880. To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London. "Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, Dr. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a "deliberate breach of faith on the part of the chemist to prescribor and patient alike." We are, sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy,s Chemists."

Extract from the General Board of Health, London, as to its efficacy in Cholera—"S o strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

CAUTION—None genuine without the words 'Dr J Collis Browne' on the Government Stamp. Overwhelming medical testimony accompanies each bottle.

ROUGHING IT IN THE COLONIES.—There can be no doubt that a man has to put up with many little inconveniences when he settles in a new country; some of them arising from 'the necessity of things,' whilst others are the result of his own want of knowledge or foresight. However, if he can secure pure water and good bread he will manage to get along tolerably well. Thanks to the advance of chemical science, this last desideratum is not so difficult to obtain as in times past, for with a good supply of BORWICK'S BAKING POWDER, even Robinson Crusoe himself might have produced the whitest and most palatable of bread, to say nothing of cakes and pastry *ad libitum*, and would doubtless have ended by opening a pastry-cook's shop upon his desert island. NOTA BENE.—Don't forget to ask your storekeeper to put up a good supply of this valuable article with your groceries. In packets, 1d, and 2d.; boxes, 6d. and 1s. each. (a)

ST. MARY'S PREPARATORY SCHOOL

Knockbeg, Queen's County.

In Carlow Lay College students are prepared for the Army, for the various professions, and for Degrees in Arts in the University of London.

Amongst Catholic Colleges, Carlow ranks next to Ushaw and Stoneyhurst in the number of her students who are graduates and undergraduates of the London University. An Examiner from the University of London holds Examinations in Carlow College, to confer Degrees in Arts.

There is a special class under a competent master to prepare students for commercial life, and no exertion is spared to secure the progress of the pupils in the junior classes.

The College is healthfully situated in a park of six acres, which forms extensive recreation grounds for the students.

TERMS:

Pension, including all extras, 35 guineas per annum.

Pension, exclusive of extras, 30 guineas.

St. Mary's Preparatory School

In connection with Carlow Lay College, the Preparatory School of St. Mary's, for Children from eight to twelve years of age, has been re-opened.

Rector—Rev. William P Bourke.

Matron and Professor of French and Music—Miss Finneran.

English Master—Mr P Harnett.

The School is strictly and purposely limited to children of such age, in order that they may be totally separated from the grown boys, and may have all the advantages of minute attention which their tender ye require.

The children at St. Mary's are under the special care of the matron, and the rector takes charge of their religious instruction.
